### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus and method thereof comprising elements being configured as recited in claims. Specifically, none of the prior art teaches or fairly suggests, among other things, the following limitations:

- a third sub-circuit, having inputs coupled to the first sub-circuit and the second sub-circuit and an enable output, the third sub-circuit, when at least one of the control voltage and the pulse are not detected at the end of the first interval of time, provides an enable input to the phase locked loop with the second value and maintains the enable input with the second value for a second interval of time and thereafter provides the enable input the first value for at least a third interval of time as required by claim 1.
- when the control signal in the phase locked loop is above a maximum allowed value or below a minimum allowed value, disabling the phase locked loop for a second interval; and when the control signal in the phase locked loop is below a maximum allowed value and above a minimum allowed value, indicating that the output of the phase locked loop is stable as required by claim 12. And,
- when the control voltage in the phase locked loop is not above a threshold and at least one pulse is produced from the output of the phase locked loop, disabling the phase locked loop for a second interval; when the control voltage in the phase locked loop is above a threshold and at least one pulse is produced from the output of the phase

locked loop, producing an indication that the output of the phase locked loop is stable as required by claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
